

Environmental Policy

RB1 recognise that all products and services generate environmental impacts, and we are committed to protect the environment and the prevention of pollution caused by our business.

We are dedicated to maintaining the internationally recognised environmental standard ISO 14001 and continually seek to improve performance through increased efficiency, reduced waste and cutting-edge innovation. We set and review objectives at regular intervals. Compliance with relevant environmental legal and other requirements is an integral part of our environmental management system and provides an excellent indication to shareholders, regulators, employees, the local authority, suppliers and the surrounding community of the Company's dedication to continual improvement.

We are dedicated to maintaining the internationally recognised environmental standard ISO 14001 and continually seek to improve performance through increased efficiency, reduced waste and cutting-edge innovation. We set and review objectives at regular intervals.

Compliance with relevant environmental legal and other requirements is an integral part of our environmental management system and provides an excellent indication to shareholders, regulators, employees, the local authority, suppliers and the surrounding community of the Company's dedication to continual improvement

The objectives of RB1 Group Board and management are to:

- Maintain and develop an effective Quality Management System in compliance with ISO 14001.
- To prevent harm to the environment from our activities at all times.
- Monitor environmental performance take corrective action where required to meet the needs of interested parties.
- Measure quality improvement performance against pre-set Key Performance Indicators (KPIs) resulting from our Environmental Cycle.
- To achieve these objectives, it is incumbent on all personnel to be fully committed to the implementation of RB1 BMS.
